ADI PRO 0E-CDMX915HH

HALF D-SUB HOOD FOR 0E-CDMX9F AND 0E-CDMX9M CONNECTORS

Designed to be used exclusively with our ADI PRO 9 pin and 15 pin d-sub connectors. The patent-pending “half-hood” is perfect for high density applications where side by side mounting of our solderless ADI PRO d-subs are required. The extended slotted tray provides the perfect place to secure the wire with a standard cable tie, for the ultimate strain relief. The 0E-CDMX915HH can be used directly on the back of a device, plate or panel.

0E-CDMX915HH

FEATURES

Terminate the wire to ADI PRO connector (sold separately)

Slide and snap connector into the ADI PRO 0E-CDMX915HH hood

Attach cable tie to slotted tray for strain relief

When mounting to a device – use the supplied thumbscrews

When mounting to a plate or panel – use the hex stand-offs supplied with the connector
