LiftMaster 2nd Generation Smart Readers

Using myQ Mobile Credentials, residents can simply tap a smartphone against a LiftMaster Smart Reader or Smart Video Intercom or press a push notification on their phone from the myQ Community app to unlock connected entrances. To unlock any door in the building—from the front entrance to the gym or mail room—our myQ Community app empowers residents to easily move around their building, letting visitors and deliveries in from their smartphone.

Popular features

Cloud Based Control
With the myQ Community app and myQ Community web portal.

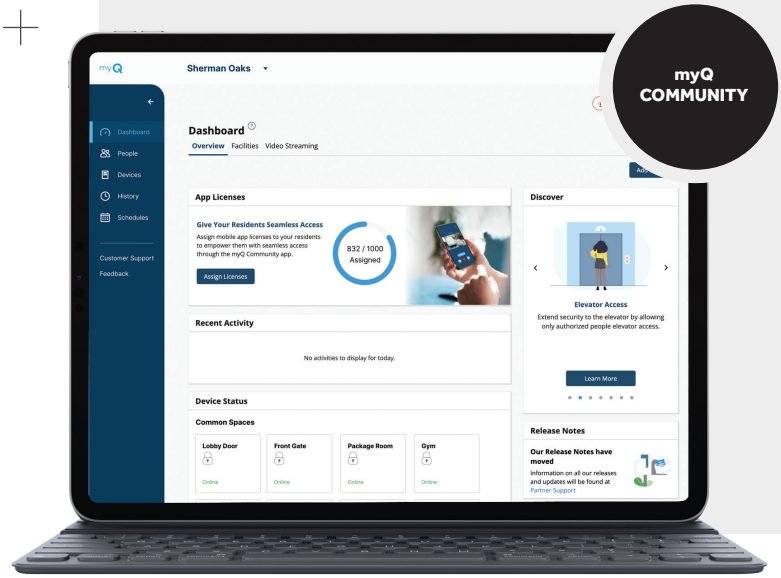

Safety

OSDP V2.2 compliance ensures compatibility with modern access control panels. Advanced encryption meets security compliance requirements now and in the future.

Versatile
myQ Community works for any building type or entrance. You can use the myQ Community app to access the front door, elevator, gym, mail room or parking garage. Admins can add new doors to manage access anywhere it is needed. The hardware is easy to install and the myQ Community software is even easier for managers to use.

Convenience
No keys? No problem. With the myQ Community app, residents can easily present their smartphone to the Smart Video Intercom at their entrance or press the push notification alert on their smartphone to enter the building. They can follow the same process to open any other door in their building that has the LiftMaster Smart Reader. Plus, admins can easily assign or revoke access as needed.

Easy to Install
Upgraded wall plate and swivel mounting installs on any surface quickly and securely. Terminal block or pigtail wiring options accommodate any door configuration without custom work.

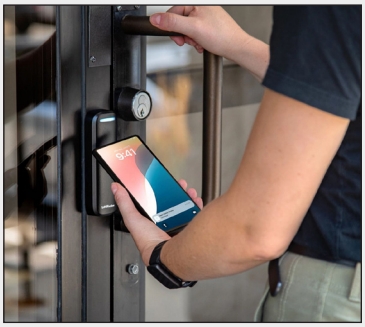

Cloud-based access management

The myQ Community cloud-based web platform lets you conveniently manage and control multiple access points across all communities in your portfolio from a single dashboard. And when combined with the myQ Community app, you will be able to easily add/delete residents, assign access to specific myQ Community connected entrances and receive real-time activity alerts to help you maximize efficiency and improve operations.

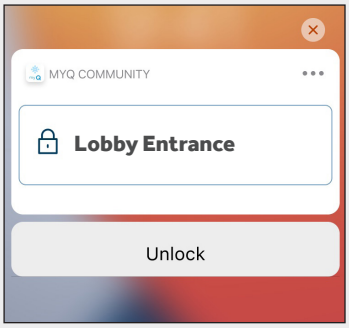

myQ mobile credentials: A modern amenity

The LiftMaster Smart Readers enable myQ mobile credentials, providing seamless entry for residents across a building, while maintaining security. A Smart Reader allows residents to use their smartphones as an all-access pass to enter buildings, elevators, parking garages and package rooms. This eliminates the need for physical credentials like key cards or fobs that can be lost, stolen or easily cloned. The myQ Community app produces credentials that are unique, highly encrypted, and non-replicable, ensuring secure and frictionless access experiences for residents. Mobile phones that are lost or stolen can be locked remotely so credentials are protected. With myQ Community mobile credentials, all you need is your phone for convenient access to connected entrances.

Tap
Tap your smartphone against the Smart Reader to receive access to the building.

Alert
Press the myQ Community push notification that pops up on your smartphone while you are walking towards the reader to open the right door.

Other myQ Community app features.

Open the Door with Apple Watch
Out for a run? Residents can leave their keys and phone at home. myQ Community is compatible with an internet-connected Apple Watch so residents can open the door to the building from their wrists.

You can also view event history—including if a visitor entered the building via a guest pass—and play captured videos from the Smart Video Intercom on the Apple Watch.

Video Calling
With a Smart Video Intercom and the myQ Community app, residents can see guests when they arrive at the door and communicate with them via 2-way audio.

Recurring Pass
Receive regular visitors? A Recurring Pass allows residents to offer access to frequent guests such as dog walkers or family members. These permissions are customizable within the app.

One-Time Code
Does a resident need to give one-time access to someone like a delivery worker? myQ Community lets them send a unique code that allows a visitor to enter the building for just one specific period.

"Hey Siri"
Don't reach for the phone. myQ Community is compatible with Siri so you can let guests in by voice command. This is especially helpful for residents who are multi-tasking around their apartment.

Specifications

Voltage
5–24 VDC

Temperature Range
UL tested -35° to 66°C and EN -40° to 70°C and 95% humidity
Environmental Rating and state
UL294 Suitable for Outdoor Use

Form Factors
Mullion (SRDRMMv2)
Mullion with keypad (SRDRMMv2)
Single Gang (SRDRSTv2)
Single Gang with Keypad (SRDRKPv2)

Security Factors
EAL6+ Secure Element

Country of Origin
USA

Warranty
Lifetime on non-keypad models,
3-year on keypad models

Regulatory Compliance
FCC and IC Certified, CE DoC with EN 62368-1:2014 and related, EMC/Spectrum tests, UL294, OSDP Verified to V2.2, IP65 or better, Plastics: UL94-V0, UL746C-F1 for UV/water resistance

RF Technology
13.56 MHz (NFC), 125 kHz (Prox), Bluetooth BLE 5.3

Autodetect
Automatically detects if the device is installed in a Wiegand or OSDP infrastructure.

Remote Firmware Upgrades
Supported for radio enable/disable and control sequencing

Credential Support
All Ethos-supported credentials, including NFC, Prox, and Bluetooth

LEDs
Red/Green/Blue LED light bar at the top (Visual Feedback)

Tamper
Accelerometer-based tamper detection

Connectivity

Dependant on door control device: CAPXLV, CAPXLV2, CAPXM, CAPXS, CAP2D, CAP4AP, or CAPXAP.

Construction

Material:
Reader electronics conformally coated in a silicone water resistant coating

Country of Origin:
United States
