Smart Security Backed by Managed Power

Keep Security Systems Running Reliably

From cameras and NVRs to access control and network infrastructure, WattBox helps maximize uptime with proactive monitoring, remote power management, and automatic recovery. Resolve issues faster, reduce service calls, and keep customers protected without rolling a truck.

Why Security Integrators Choose WattBox

Keep Systems Online

Intelligent power management, automatic recovery, and power protection help maintain uptime across cameras, recorders, access control systems, and network equipment.

Reduce Truck Rolls

Diagnose issues and remotely reboot connected devices to restore service without costly on-site visits.

Protect Critical Infrastructure

Professional-grade surge protection, Safe Voltage protection, power conditioning, and battery backup options help safeguard essential security equipment.

WattBox Delivers Value Across the Security Ecosystem

Device	WattBox Value
Router / Firewall	Restore internet connectivity remotely and bring critical security systems back online faster.
Network Switches & Access Points	Maintain network performance with protected power, scheduled reboots, and remote recovery capabilities.
Cameras & NVRs	Reduce surveillance downtime by remotely recovering recording and network infrastructure.
Access Control & Security Systems	Maintain reliable operation with protected power and remote reboot capabilities.
AV & Digital Signage	Protect displays, media players, and AV systems while enabling remote recovery when issues occur.

WATTBOX + OvrC

Manage More Accounts with Less Effort

WattBox and OvrC help security professionals streamline support through remote monitoring, automated recovery, and real-time alerts.

Keep Systems Online

Automatically recover from connectivity issues and restore service without manual intervention.

Reduce Service Costs

Troubleshoot and reboot devices remotely, limiting unnecessary site visits.

Stay Ahead of Problems

Get alerted to device, power, and battery issues before they become customer calls.

Small Deployment

Big Reliability for Small Installations

Network Hardware
Modem / Router / Switch

WattBox 2 Outlet Wi-Fi IP Power Conditioner

Surveillance
NVR + Cameras

For smaller installations, WattBox provides professional-grade power protection and remote power management in a compact solution. Remotely reboot connected devices, recover from common network issues, and reduce service calls while helping keep critical equipment online and protected from surge events.

Large Deployment

Built for the Entire Security Ecosystem

As security systems expand, maintaining uptime becomes increasingly critical. WattBox helps protect and manage cameras, recorders, networking equipment, and access control systems with intelligent power management, surge protection, battery backup, and automated recovery capabilities that keep critical infrastructure running when it matters most.
