

2N

Product Catalogue

Intercoms, indoor stations, smart access readers, electronic locks, and accessories

2N.com

A woman with long, wavy blonde hair is shown in profile, looking out a large window. She is wearing a white long-sleeved shirt and blue trousers. On her left wrist, she wears a smartwatch with a dark face and a light-colored band. The background outside the window shows a blurred view of green trees and a building. The lighting is bright, suggesting daytime.

Reliable innovations

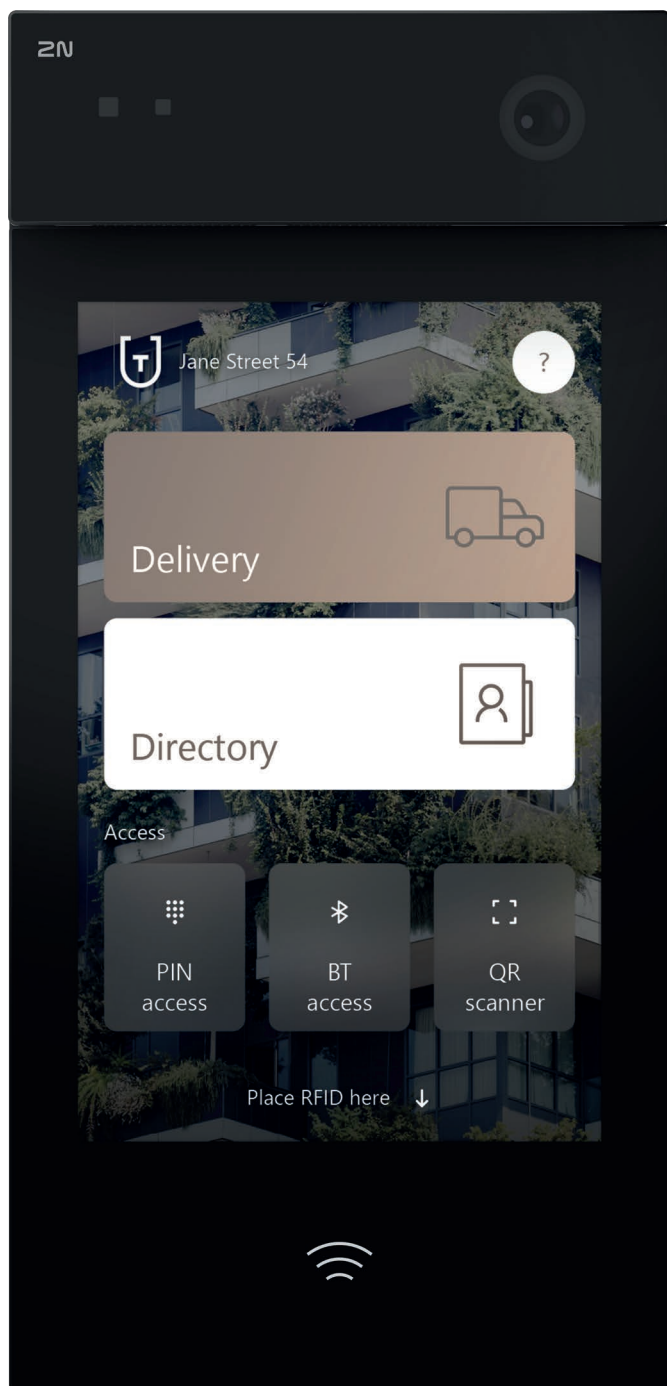

Build a modern access control solution that exceeds all your expectations. 2N set industry standards and never compromise on (cyber)security.

IP Intercoms

Don't choose between secure
and convenient communication.
Demand both!

2N IP Style

Premium intercom
with a **10" display**
and **5MP camera**

The wide-angle camera of the 2N IP Style can pick up images for video calls even in bad lighting - and you can choose from four access technologies including cutting-edge mobile access. Add to that smooth animations plus resistance to any weather - and you have an intercom that **sets standards for years to come!**

Choose between a standard version, a version with secured card support, or a version with a unique **AntiBac screen protector**. Install it flush or surface.

the product

reddot winner

2N IP Verso 2.0

High-end **modular intercom**
with endless possibilities

The second generation of the world's best-selling IP intercom boasts a wide-angle, **Full HD camera** and advanced features such as QR code reading. Choose from **16 different modules** and combine them however you want.

Available in nickel or black finishes, camera or non-camera versions, flush, surface or glass mount. Top-selling modules include a **touchscreen**, a reader combining Bluetooth with RFID and a touchscreen keypad.

reddot winner

2N IP Force 2.0

Extremely durable intercom with 5MPx camera

Designed for demanding environments where maximum security and seamless access control are essential, the 2N IP Force 2.0 **delivers crystal-clear video and sound in any environment** thanks to the Full HD camera and advanced noise cancellation. It's also rated IP69 and IK10 - meaning it easily resists accidental or deliberative impact, tampering, water, and dust. The Axis ARTPEC-8 processor powers advanced features such as adaptive face-zooming and QR code access. It comes in several variants, including RFID-ready (with an OSDP interface), keypad, button-only, and more.

the products

2N IP Safety

Unmissable SOS intercom

The 2N IP Safety is an extremely durable intercom designed for emergency communication in car parks, cities, highways, or factories. **The bright orange** finish makes it easy to find, and it's simple to use too - users just click one button for a direct call to the **SOS line**.

Choose from three versions: one button, two button, or a raised emergency button.

2N IP Solo

Stylish IP intercom ideal for home automation

A compact yet clever IP intercom featuring a hidden HD camera, calls to mobile phones, and easy integration into home automation systems.

Colour variants

2N IP One

Smart intercom for family homes

A one-button intercom in a compact, stylish design that boasts a Full HD camera, durable design, QR code reading, and free mobile access via the My2N App.

Colour variants

Access readers & electronic locks

Reliably secure areas that don't need video communication.

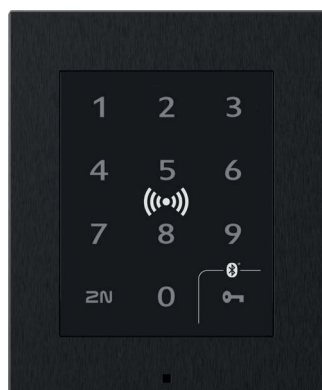

2N Access Unit M

Smart reader in a **slimline design**

The 2N Access Unit M combines both a **reader and controller in one device**. A single UTP cable is enough for connection and power supply, and thanks to its compact design, you can easily install it on **door frames** or anywhere you're struggling with space.

Choose from several options - RFID, RFID combined with mobile access via Bluetooth, or RFID with a keypad. The latter is perfect for projects with **double authentication** requirements.

2N Access Unit 2.0

Modern reader with **multiple installation options**

Need an access reader for your project but don't want to compromise on style? **Users and architects** alike will love the 2N Access Unit 2.0. It matches the design of the 2N IP Verso 2.0 and you can install it surface, flush and glass. What's more, controllers are included in every reader in our portfolio.

Choose modern access by mobile phone, QR codes or fingerprint. Prefer traditional methods? Then we offer an RFID card reader or keypad. Can't decide?

Choose a **combination of multiple methods** in one device.

Indoor stations

Advanced features of modern
residential access wrapped
up in award-winning design.

2N Indoor View

Sleek indoor station
with 7" touch display

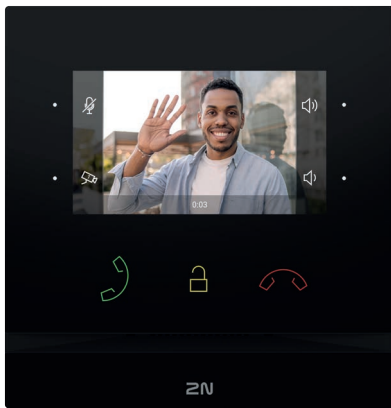

The 2N Indoor View supports HD video calls and will be at home in even the most luxurious of penthouse apartments. Stream the feed of up to **16 connected IP cameras** and, thanks to the sending of HTTP commands, fully integrate the unit with home automation systems.

It can be installed on the wall (flush or surface mount) or in a stand the user can place where they like.

Want to offer all this to a building with no network cabling, or to a project where you can't install Ethernet easily? The 2N Indoor View is also available in a Wi-Fi variant.

More about
the product

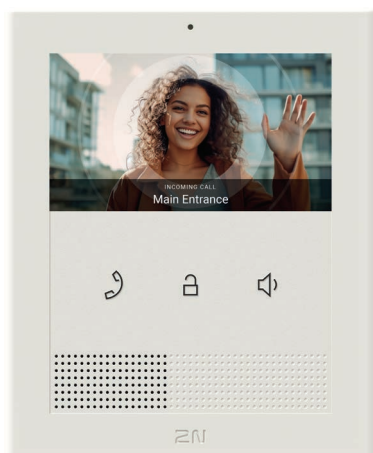

2N Indoor Compact

Indoor station with 4.3" display

Premium materials, first-class workmanship, and **dozens of advanced features**: all wrapped up in a compact design.

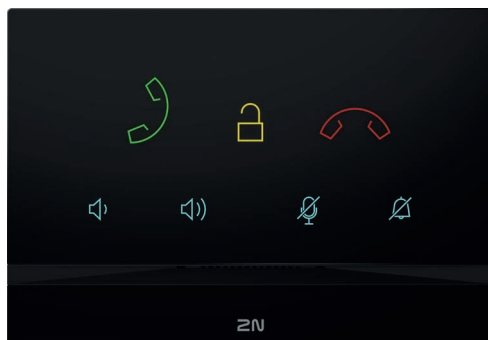

Colour variants

2N Clip

The power of IP for every home

Bring the convenience and safety of high-quality video to mid-range residential projects. The 2N Clip offers IP video calls on a compact 4" screen.

2N Indoor Talk

Stylish audio indoor station

Audio communication is enough for some projects, but appearance still matters. Choose a unit with a **tempered glass surface** and smooth edges.

Colour variants

2N IP Phone D7A

A modern device for a modern reception

Management Platforms

Don't waste time configuring individual devices: set up the entire solution with ease.

2N Access Commander

Advanced management of access control systems

The 2N Access Commander software is the ultimate tool for the **local management** of your access control system. It has been developed specifically for commercial buildings with large numbers of devices and is still simple to use. Set up multiple administrator roles and **delegate** system management to the customer to save your time!

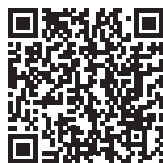

More about the product

The software is available for download at 2n.com, or you can order it pre-installed on a mini-PC.

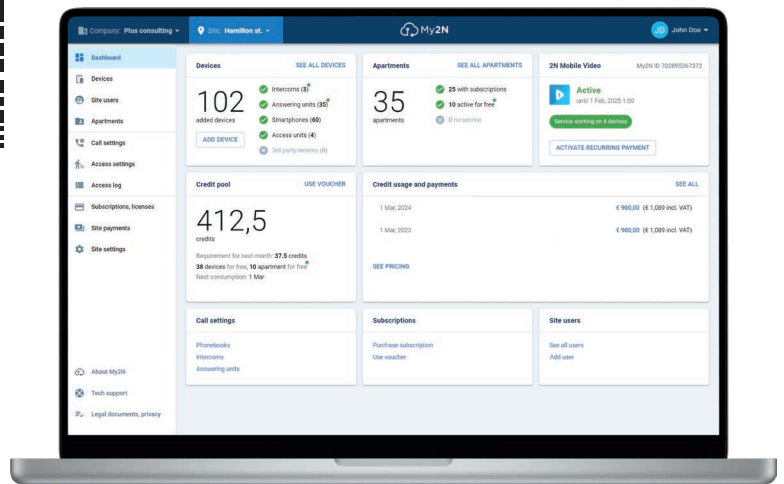

The My2N Management Platform

Efficient and remote installation management

More about the product

In the My2N **cloud platform**, you add and remove users and devices, manage access rights, update firmware, diagnose and troubleshoot – all from **anywhere in the world**. My2N offers straightforward and convenient management, especially suitable for residential installations.

2N OS

The 2N OS delivers **powerful, flexible control** for installers who need **advanced configuration** or are managing smaller, standalone systems. Each device can be set up individually through its intuitive web interface, giving you full access to detailed settings and integrations.

Real projects. Real needs solved.

High-spec project, high-quality access

A luxury development in Prague wanted a modern, high-quality access solution that matched the high-spec finish of the project. Now, residents can:

- Move seamlessly throughout the building using a single credential
- Answer calls and unlock doors from anywhere via their smartphone
- Give guests access in advance via the My2N App

The result? Smooth daily access, strong security, and modern features for unmatched convenience.

Seamless living & motion

A large residential complex in Vienna needed smooth yet secure access that enhanced the day-to-day lives of residents. 2N made it possible to:

- Use mobile, QR codes, and RFID for entry
- Access pre-booked shared areas using app-generated PINs
- Answer their doors remotely via the My2N App

The result?

Convenient access and improved security across all zones.

Reliable and keyless

A large, mixed-use building near London with high footfall wanted key-free, flexible, and reliable access. With 2N, users can now:

- Enter & move around using their smartphones instead of keys
- Enjoy fast, reliable access that keeps a variety of private areas protected
- Benefit from strong security throughout the space

The result? A safe, modern space powered by smart access control.

More case
studies

The logo consists of the letters '2N' in a bold, white, sans-serif font. The background of the entire page is a photograph of a dark, textured door with a horizontal handle, partially obscured by green bamboo leaves on the left side.
