ON-Q

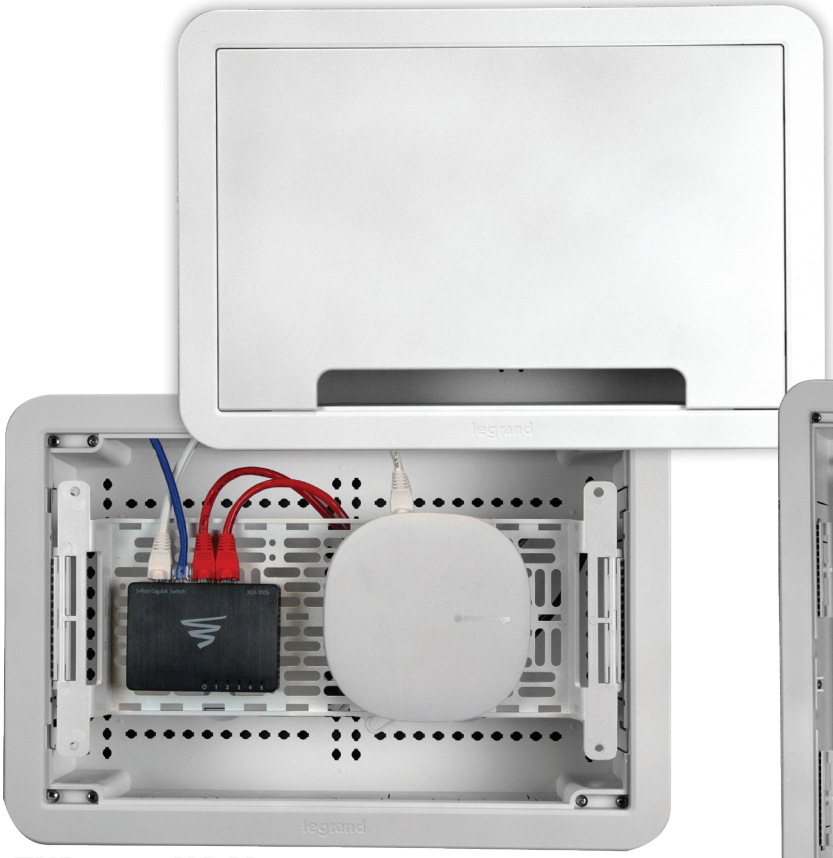

DUAL-PURPOSE IN-WALL ENCLOSURES

For AV Storage and Media Distribution

The 9" and 17" Dual-Purpose Enclosures are engineered to provide in-wall or on-wall storage of structured wiring and AV components. The dual-purpose enclosures are constructed of Wi-Fi transparent material to manage wireless components and AV equipment at point-of-use locations, like directly behind a TV or other media centers. The enclosures can also be used for structured wiring purposes, as smaller-sized options in the existing line of On-Q enhanced structured wiring enclosures. Generous knockout configurations support conduit and in-wall wiring, while the cable pass-through cover allows for cable connections outside of the enclosure. Built-in cable management keeps wiring neat and tidy. The enclosures include a trim plate and drywall clips, allowing for both new construction and retrofit installations. The ENP1705-NA-V1 and ENP0905-NA-V1 also include a 5" mounting plate with 1.5" of elevation to use as a second layer of mounting – freeing up space in the enclosure.

MADE IN U.S.A.

ENP0905-NA-V1

ENP1705-NA-V1

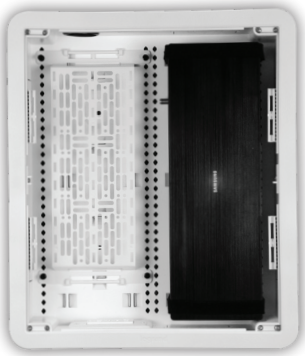

ENP0900-NA: 9" Enclosure with Cover and Trim
ENP0905-NA-V1: 9" Enclosure with Cover, Trim and Mounting Plate

ENP1700-NA: 17" Enclosure with Cover and Trim
