FIRST ALERT®

ProSeries

The flexible, reliable platform for residential and small business security.

Designed with ease-of-use in mind, ProSeries enables you to provide security, life-safety, and home-control features that help your customers feel safe, secure, and in control. Backed by Resideo's decades of experience, ProSeries is a trusted solution designed to help you succeed.

Trusted in 150 million homes

Resideo products are installed in over 150 million homes, helping customers feel comfortable, safe and secure worldwide.

Win. Keep. Drive.

Helping your business win more customers

Security and innovation at every step

Modular by design, ProSeries products can be customized to your customers' individual lifestyles. Responsive alerts are faster than before, and the system now offers hands-free disarming for an enhanced user experience. Takeovers and upgrades are simple, cost effective and stress free. The future-proof system can grow with customer needs and is ready for the next technology trend.

Advanced life safety

ProSeries products help you take care of premises – and people. Smart sensors detect smoke, heat and CO, triggering One-Go-All-Go alarms and initiating audio and visual evacuation warnings throughout a building.

The smarter home

ProSeries products offer your customers a smart, connected home with a single, easy-to-use app, that controls lighting, locks, thermostats and more. Optional features like video storage help you upsell and increase your RMR.

The more aware consumer

ProSeries deploys solutions that increase customer engagement as they are kept aware of activity in and around the home. With new 24-hr. awareness response, and configurable sound options, used with motion viewers, motion sensors, and door/window sensors, you may deploy solutions for a host of problems where the user may wish to be notified without getting the central station involved. Notifications are delivered using the control panel and Resideo Total Connect®.

Small business security

All ProSeries products use the same peripherals and controls for small-to-mid-sized businesses and households, meaning no need for additional training or stock. With world-leading certification and compliance, the system can flexibly cover up to four partition areas and provides video alert verification.

All around professionally monitored security – helps give your customers peace of mind.

With the PROA7PLUS, Amazon Alexa isn't simply enabled – it's built in! Customers get Alexa functionality, so whether they want to check the weather forecast, or raise their thermostat, they can do so with simple voice commands. Users can also view live video of First Alert VX Series cameras and doorbell on the panel.

ProSeries MotionViewers allow users to react with insight. HomeKit® allows inclusion of security into the Apple Home ecosystem and the built-in camera captures who disarmed the system. Hands-free disarming disarms the system without the need to enter a code.

**Available on ProSeries PROA7PLUS*

- Modular design means customizable solutions for individual lifestyles and price points
- One-Go-All-Go alarms for connected life safety solutions
- One system works for residential and small-medium business customers
- Compatible with smart home technologies for connected, supported living
- Equipped with customized voice descriptions
- Motion viewers deliver alarm or awareness solutions

Win. **Keep.** Drive

Keep your customers longer

Increase the lifespan

ProSeries products are future-proof, designed to grow with your customers' needs. Technology upgrades are easily accommodated and extend the product lifespan for your customer.

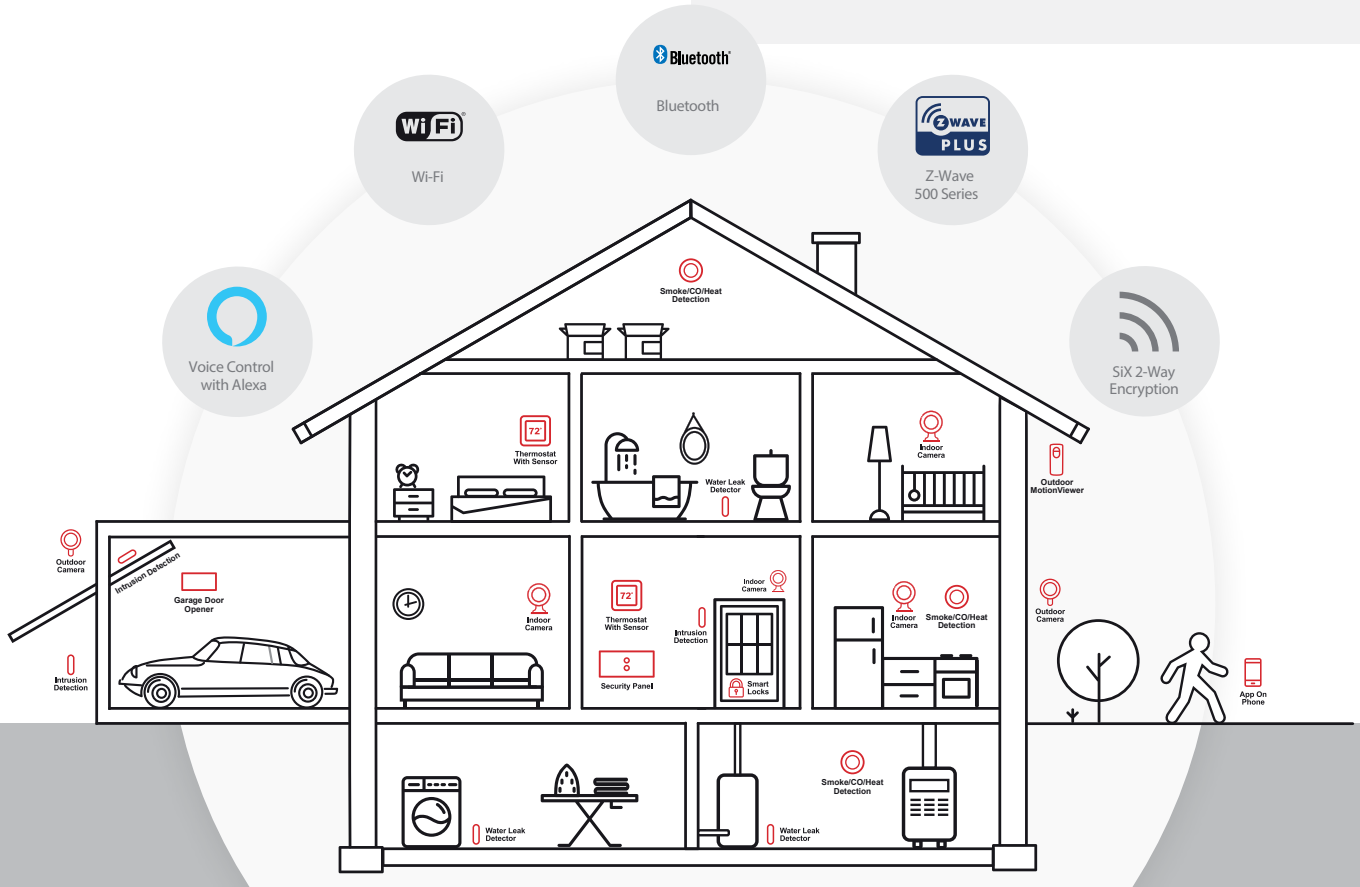

Protect and grow with AlarmNet 360® Insights

AlarmNet 360 Insights shows how your customers engage with ProSeries products. It helps you manage, filter, export and sort account information, using real time, interactive dashboards that identify customer needs, so you can act on new opportunities as they arise.

Protect your customers

ProSeries products make takeovers easy for you, but difficult for competitors. Our sensors lock to our panels, preventing re-use, which means customers considering a change must get in touch with your team, allowing you an opportunity to discuss their needs.

- Modular to support changing needs and technologies
- Future-focused design to increase lifespan
- Customized voice descriptors
- Locks your sensors and protects your RMR
- Dealer branding increases your awareness with customers
- Enhanced notifications keep end-users aware

Whole home protection with one system

Some features only available on ProSeries PROA7PLUS

Win. Keep. **Drive.**

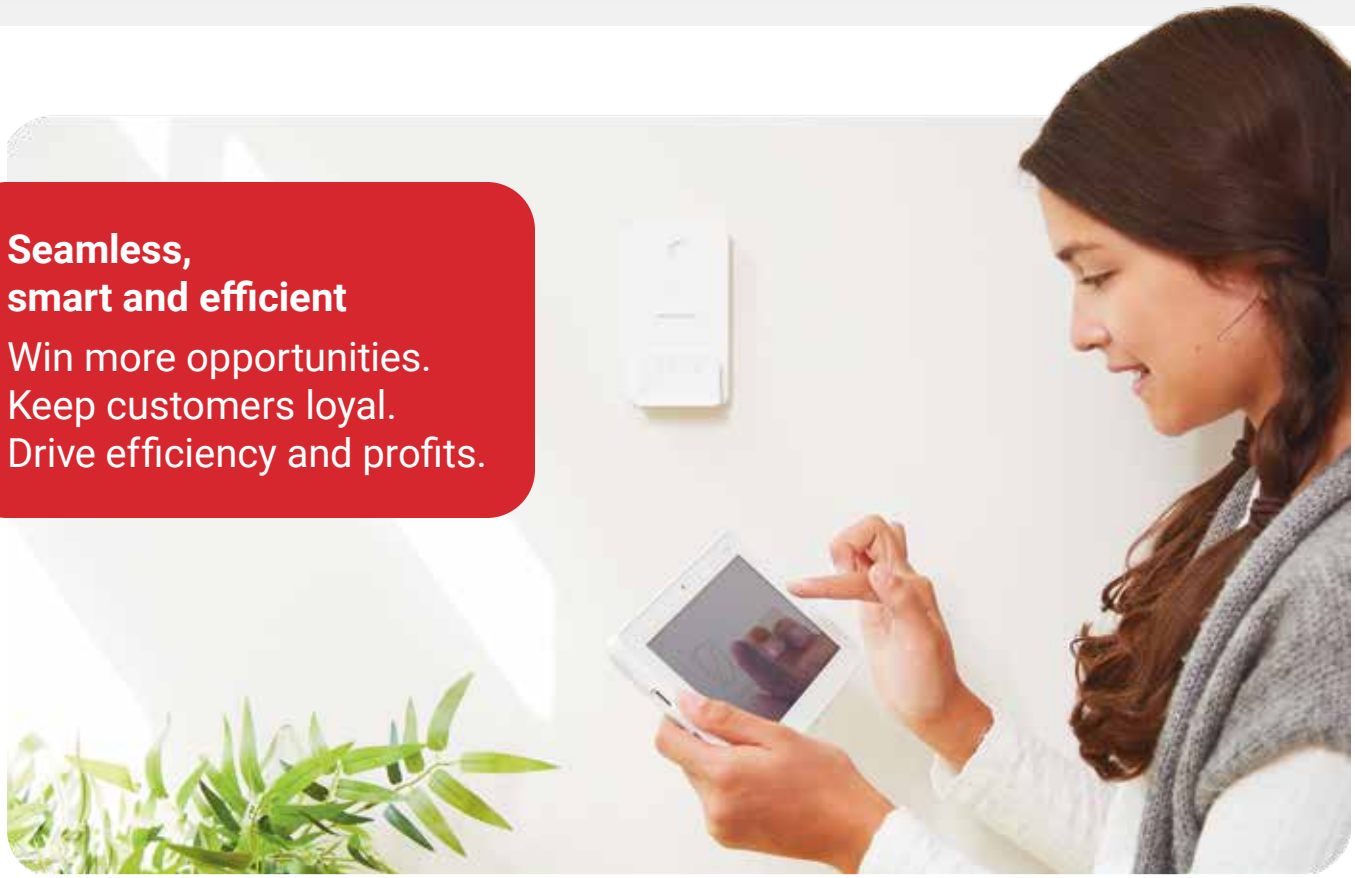

Drive more profits

More options. More choice.
The ProSeries family of products has a broad range of modular security, life-safety, awareness and home control accessories, resulting in more opportunities for you to re-engage and upgrade customers after the sale.

More efficient. More revenue.
ProSeries products exemplify efficiency which could mean more revenue for you. Customizable templates and checklists facilitate smoother installs. Over-the-air updates and end-user replaceable parts reduce truck rolls, and due to the platform's modular, consistent design, training requirements are minimized. All of this gives you more time to spend on your business.

No internet. No problem.
ProSeries products can be programmed locally on the panel's touchscreen keypad utilizing a user-friendly and intuitive interface that follows the same menu structure and options available with AlarmNet 360® web and mobile. This provides you with a choice of programming features that best benefit your company.

- Optional end-user replaceable batteries and modules
- One system — hardware, software and support, all together
- Remote system diagnostics
- Easier-to-learn, simpler user interface
- Universal peripherals for efficient stock control
- Over-the-air updates
- Anytime-anywhere system maintenance
- Fully encrypted end-to-end

Seamless, smart and efficient

Win more opportunities.
Keep customers loyal.
Drive efficiency and profits.
