

ELIMINATING THE #1 BARRIER TO DIGITAL TRANSFORMATION

PRODUCT BATTLE CARDS FOR PARTNERS

THE #1 BARRIER

DATED NETWORK THINKING

Legacy approaches can't support today's needs.

TRADITIONAL SWITCH REACH AND CABLE LIMITATIONS

Distance, bandwidth and power constraints hold you back.

RISK AND COMPLEXITY

Complex deployments increase time, cost and uncertainty.

SECURITY CONCERNS

More endpoints. More exposure. Higher risk.

NVT PHYBRIDGE
DISRUPTIVE PoE SOLUTIONS

UNLOCK WHAT'S NEXT

FASTER REVENUE

Win more projects and close deals faster.

MORE REVENUE

Expand opportunities and grow your pipeline.

BETTER MARGINS

Lower total cost solutions drive higher profitability.

BRINGING VALUE TO CUSTOMERS

Solve real challenges and deliver lasting impact.

BREAK THE BARRIER.
ACCELERATE TRANSFORMATION.

NVT Phybridge PoLRE® Battlecard

The only switch to deliver Ethernet and Power Over a Single Pair of UTP cable with up to 1,200ft (365m) reach.

PoLRE TECH DIFFERENCE

PoE over a single pair of wire with extended reach – Managed and unmanaged switches – Robust PoE power capabilities – Best performing single pair switch with similar results to traditional switches over traditional CAT5E cabling.

PERFORMANCE MATTERS

Same latency performance for PoLRE on 1,200ft (365m) of CAT3 single pair vs the Cisco Catalyst switch on 250ft (76m) of CAT5E cable.

Improve IP Modernization Outcomes for You and Your Customers

PoLRE24/PoLRE48

24-Port and 48-Port Managed Power over Long Reach Ethernet Switch

PoLRE LPC

8-Port Unmanaged Power over Long Reach Ethernet Switch

Phylink

Single-Port Power over Long Reach Ethernet Adapter

NVT Phybridge PoLRE® Reseller Battlecard

The only switch to deliver Ethernet and power over a single pair of UTP cable with up to 1,200ft (365m) reach.

PoLRE TECH DIFFERENCE

PoE over a single pair of wire with extended reach – Managed and unmanaged switches – Robust PoE power capabilities – Best performing single pair switch with similar results to traditional switches over traditional CAT5E cabling.

WHO IS NVT PHYBRIDGE?

NVT Phybridge is a North American technology innovator and global leader in disruptive, award-winning PoE network innovations that are TAA & NDAA compliant. Since 2007, NVT Phybridge has helped organizations modernize to IP while eliminating the high costs, disruption, and complexity associated with traditional rip-and-replace network projects.

Why Partners Trust NVT Phybridge

- Over \$1 billion in revenues accelerated
- Together, helped end users save over \$300 million in infrastructure costs
- Pioneer in Ethernet and PoE over a single pair of wire
- North American innovation with global adoption
- Trusted by government, healthcare, education, hospitality, transportation, and enterprise organizations

POSITIONING MESSAGE

Modernize to IP Without Compromise

NVT Phybridge helps organizations build secure, robust, and scalable IP networks while dramatically reducing infrastructure costs, deployment complexity, and operational disruption.

QUICK RESOURCES:

Product:

- [PoLRE Family Page](#)
- [24 & 48 Port Managed Switch](#)

THE CHALLENGE

Traditional switch infrastructure creates major barriers to IP modernization:

- High cabling and infrastructure costs
- Operational disruption during deployment
- Complex network redesigns
- Security concerns
- Long deployment cycles
- ROI and TCO assurances
- Increased pressure on the customer's IT resources

KEY BUSINESS OUTCOMES

For Distribution & Reseller Partners

- Be a thought leader – bring value to customers
- Accelerate revenues & improve margins
- Shorten sales cycles
- Simplify deployments
- Differentiate from competitors
- Eliminate infrastructure objections
- Create scalable and repeatable customer success

KEY BUSINESS OUTCOMES

For End Users

- Reduce infrastructure costs by 40% to 80%
- Eliminate disruption and downtime
- Improve ROI
- Modernize faster
- Build a more secure and robust network
- Enable an all-IP environment
- Reduce stress & management complexity on IT teams

TARGET VERTICALS

- Government
- Corrections
- Healthcare
- Education
- Hospitality
- Transportation
- Retail & Banking
- Distributed Enterprise
- Hosted & Cloud Environments

Key Stakeholders

- CIO / CTO
- IT Leadership
- Voice Teams
- Physical Security Managers
- Operations Leadership
- Digital Transformation Teams

CONVERSATION STARTERS

- “How are you currently connecting IP endpoints back to the application?”
- “Are infrastructure costs or disruption slowing your IP modernization projects?”
- “Have you explored alternatives to rip-and-replace network infrastructures?”
- “Would reducing deployment complexity and accelerating ROI create value for your organization?”
- “Are you looking for a more secure and scalable path to all-IP?”
- “Have you heard of Modern LAN Principles by Frost & Sullivan?”

THE NVT PHYBRIDGE ADVANTAGE - PoLRE® Technology

The PoLRE switch family delivers Ethernet and PoE over a single pair of telephony-grade wire (CAT3, 1308 or better) with up to 4X the reach of traditional switches.

This allows you to confidently modernize to IP using your existing infrastructure - without costly rip-and-replace projects.

“Did you know no other switch provider in the world has the breadth and depth of Single Pair UTP, Coax, and 2 or 4 Pair solutions?”

IDEAL APPLICATIONS

IP Endpoints Supported

- IP Phones
- IP Speakers
- IP Dect
- IP Access Control
- IP Sensors
- Low-bandwidth IP Cameras
- Any IEEE 802.3af compliant device

“Delivering up to 22 Watts of power over a single pair of wire.”

Ideal Customer Indicators

- Legacy endpoints and systems approaching end-of-life
- Maintaining analog or digital endpoints
- Organizations facing infrastructure barriers
- Large distributed campuses or facilities
- Customers concerned about disruption during modernization
- Organizations wanting all-IP without infrastructure overbuild

WHY PARTNERS ARE WINNING WITH NVT PHYBRIDGE INNOVATIONS

Unique Market Differentiators

- Delivers Ethernet + PoE over a single pair of wire
- Up to 4X the reach of traditional switches
- Eliminates costly rewiring & IDF expansion projects
- Uses existing, proven infrastructure
- Accelerates deployment timelines, eliminating competition
- Simplifies digital transformation & retaining end-to-end control

NVT Phybridge FLEX® Battlecard

The only switch to deliver Ethernet and Power Over a two or four Pair of UTP cable with up to 2,000ft (610m) reach.

FLEX TECH DIFFERENCE

PoE over a two or four pair of UTP cable with extended reach – Managed, unmanaged and Extender solutions – Robust PoE power capabilities – Best performing switch with similar results to traditional switches over traditional CAT5E cabling.

PERFORMANCE MATTERS

RFC-2544 Test Results

Similar latency performance for FLEX on 2,000ft (610m) of CAT5E vs the Cisco Catalyst switch on 250ft (76m) of CAT5E cable.

Improve IP Modernization Outcomes for You and Your Customers

THE NVT PHYBRIDGE ADVANTAGE - FLEX® Technology

The FLEX switch family delivers Ethernet and PoE over two or four pairs of UTP cable (CAT5e, CAT6, or better) with up to 6X the reach of traditional switches.

This allows you to confidently modernize to IP using your existing or new infrastructure - without costly rip-and-replace projects or having to establish IDF closets or use fibre in new environments.

“Did you know no other switch provider in the world has the breadth and depth of Single Pair UTP, Coax, and 2 or 4 Pair solutions?”

IDEAL APPLICATIONS

IP Endpoints Supported

- IP Phones
- IP Speakers
- IP Access Control
- IP Sensors
- IP Cameras
- Wi-fi Access Points
- Any IEEE 802.3af/at compliant device

“Delivering up to 50 Watts of power over 2 or 4 pair UTP, up to 2,000ft (610m).”

Ideal Customer Indicators

- Legacy endpoints and systems approaching end-of-life
- Maintaining analog or digital endpoints
- Organizations facing infrastructure barriers
- Large distributed campuses or facilities
- Customers concerned about disruption during modernization
- Organizations wanting all-IP without infrastructure overbuild

WHY PARTNERS ARE WINNING WITH NVT PHYBRIDGE INNOVATIONS

Unique Market Differentiators

- Delivers Ethernet + PoE (50W) over two or four pairs of UTP cable.
- Up to 6X the reach of traditional switches
- Eliminates costly rewiring & IDF expansion projects
- Uses existing, proven infrastructure
- Accelerates deployment timelines, eliminating competition
- Simplifies digital transformation & retaining end-to-end control

NVT Phybridge CLEER® Battlecard

The only switch to deliver Ethernet and Power Over a Coax cable with up to 6,000ft (1,830m) reach.

CLEER TECH DIFFERENCE

PoE over Coax cable with extended reach – Managed, unmanaged, and extender solution – Robust PoE power capabilities – Best performing switch with similar results to traditional switches over traditional CAT5E cabling.

PERFORMANCE MATTERS

RFC-2544 Test Results

Similar latency performance for CLEER on 2,000ft (610m) of RG6 Coax vs the Cisco Catalyst switch on 250ft (76m) of CAT5E cable.

Improve IP Modernization Outcomes for You and Your Customers
