Paxton

Smart access control and
door entry systems

Product Selection Guide

Why work with us?

Easy to quote

- Build your system one door at a time

- A range of products to suit any site requirement

- Scalable system – add doors when the budget is available

Easy to install

- Plug and play solutions that connect directly to the network

- Mix and match Net2 products – they are all designed to work together seamlessly

- Clear instructions and colour coded wiring labels

Easy to work with

- Industry-leading technical support

- 5-year guarantee and three step returns policy

- Free software upgrades and no multiple licence fees

Contents

Welcome

This Product Selection Guide is designed to help you to choose the right products to build up an access control system.

Paxton produce a variety of security solutions to suit different site requirements. Our one door philosophy means doors can be added as required or when budget becomes available.

What's new?

Paxton10

Paxton10 is a single platform solution combining access control and video management. It is a versatile solution that supports multi-site management and remote access. Scalable from 1 to 1000 doors, and 1 to 1000 cameras, Paxton10 is suitable for all building types and sizes.

▸ Easy to quote and configure, build a complete system with just five components

▸ Manage multiple sites on a single system remotely

▸ Web-based user interface with no configuration required

▸ Custom dashboards to suit any user requirements

▸ Built in **Bluetooth**® to use phone or smart watch smart credentials

▸ Works with Entry and PaxLock Pro

Networked Access Control

Our networked access control system, Net2, is administered using one or more PCs and can be monitored and managed from a central location. Our door controllers come as IP, wireless or battery powered.

- ▸ Net2 is Paxton's flagship access control product
- ▸ A powerful networked system that addresses the needs of the mid-market
- ▸ Modular approach for simplicity and scalability
- ▸ Simple intuitive software
- ▸ Range of features that move beyond basic access control
- ▸ A complete solution that encompasses wireless and door entry
# Networked Access Control

Net2 plus
Wired Controller

▶ A networked IP ready single door controller

▶ On-board TCP/IP connection allows direct connection to a network

Networked Access Control

Building Control - I/O Board

When a valid fob is presented to the reader, the I/O board can be programmed to trigger the power to elevators, lighting, heating and electrical equipment.

The Net2 I/O board is a simple, yet powerful addition to the Net2 system. It can be wired alongside a Net2 door controller, to switch power on and off to electrical equipment to save money and energy. The Net2 I/O board can control power to elevators, lighting, heating, water and air-conditioning by using the Triggers and Actions application in the Net2 software. These actions can be programmed for a particular time, or in response to a specific Net2 event.

▸ Connect directly to a LAN/WAN only

▸ Enable integration with elevators, lighting, heating and more

▸ 4 inputs and 4 outputs on the Net2 I/O board

⚠ Please note, Net2 I/O boards work as part of the Net2 system. They are not door controllers.

Paxton Connect   Paxton Key App

Paxton10 Software

A web-based user interface that is intuitive and easy to use.

Accessible from any device with an internet connection, the interface makes remote site management simple. The software comes as a native part of the system with a Paxton10 server. It has a range of intelligent features to maximise efficiency and optimize the combined access and video management solution.

▸ Web-based software – no installation, plug-ins or upgrading required

▸ Free of charge – simple online updates with no ongoing charges

▸ Suitable for touchscreen and desktop devices

▸ Optimised for use on PCs and tablets

▸ Low battery alerts, easy to monitor back up battery state

▸ Flexible and secure remote access

Features:

Dashboards - Customized dashboards to suit any user requirements

Reports - Powerful reporting engine where all system events and videos can be reviewed

Site plans - For the visual management of the system

Tutorial wizards - Support new and existing users to make full use of the software

People - Manage user permissions, credentials and information

Rules - Set permissions, time profiles, triggers and actions and much more

Devices - Configure and manage the devices in a building

Paxton10 Apps

Paxton Connect
Flexible site management

The Paxton Connect app provides easy and flexible site management for Paxton10. Containing easy to use features in one smart user interface, Paxton Connect enables you and your customers to manage multiple sites remotely from a smartphone.

Features:

People - Manage user permission, credentials and information

Reports - Access all system reports from your smart device or tablet

Devices - Configure and manage all devices on site

Dashboards - Access custom dashboards for personalized system overview

Paxton Key
Utilize smart devices as access tokens

The Paxton Key app allows system users to make use of their smartphone, smartwatch or tablet in place of traditional tokens. These are called smart credentials and can be issued free of charge. Utilizing the built-in Bluetooth® wireless technology in Paxton10 readers, the smart device can securely communicate with the Paxton10 system to grant or deny access. Paxton Key also enables the user to carry out predefined building management functionality – such as setting the intruder alarm.

Download the free apps from the **App Store or Google Play**

Video Intercom

Entry is a video intercom system that works standalone or alongside Net2 access control, combining door entry with key features of Net2.

Entry is a scalable solution, allowing expansion of up to a hundred panels and a thousand monitors.

▸ Just 3 components - monitor, panel and door controller

▸ Premium, standard, audio, and vandal resistant solutions available

▸ Intruder alarm integration - set the alarm in Net2 from the Entry panel for extra convenience

▸ Pan/tilt camera functionality to capture an angled view

▸ Low light sensitivity camera - ideal for use day or night

▸ SIP compatibility - the door can be answered from cell phone, tablet or PC

▸ Add a secondary IP camera for higher security sites

Extend up to 1000 monitors

Extend up to 100 panels

Net2 Entry - Control unit

Entry - Extension switch

Due to ongoing component supply issues, the Net2 Entry - Control Unit and Entry - Extension switch are temporarily unavailable. You can continue to install our Entry system using a Net2 Plus controller and any 802.3af or 802.3at (PoE+) compliant 3rd party PoE switch.

We recommend the TP Link TL-SF1006P switch which has been thoroughly tested with the Entry system.

Entry Standard Monitor

The latest addition to our video intercom range.

Introducing the next generation standard monitor, a versatile, feature rich and cost-effective solution.

- Excellent audio quality, full-duplex voice communication & easy read, high contrast screen

- Personalized experience with 14 theme designs. Premium user interface with call & event log

- Action buttons, call snapshot and compatibility with concierge management*

- Available with or without a handset. Universal wall or desk mounting

- Quick and easy installation, providing a true plug and play solution

*When used with the Entry Premium monitor.
The standard monitor cannot function as the concierge monitor.

Standalone Entry system does not require connection to a network or server

Entry now works Standalone

Our standalone access control is a non-networked system that provides a simple and low maintenance solution made up of readers or door controllers.

- Quick system installation with no servers or PCs required
- Simple user management
- Combine with other Paxton standalone products
- Build an entire easy-to-use system supporting the same tokens across the site
- Easily expand and upgrade to an online Net2 solution with no hidden costs
- Enable offline token-based access control on any Entry site

We also have standalone colored keyfobs and function cards to make it even simpler to manage access control within the system

Watch the Entry Video

Show your customers the benefits of our simple video intercom solution in just two minutes, with the Entry video.

▶ Featuring the whole Entry range, including the touch panel and premium monitor

▶ Just 3 components that auto-detect on set up

▶ Discover a scalable solution that suits a variety of locations

Watch it here:

Standalone
Access Control

Standalone access control is the simplest way to secure and control access through doors around your building. If you're looking to step up security, protect your staff and assets and save money, then Standalone access control is for you.

- A non-networked access control solution
- Simple and unique card management system
- Internal (Compact)/external (Switch2)
- Suitable for small to medium sized premises, or any site looking to secure a small number of doors
Switch2

Switch2 is a standalone system that comes as a separate single door controller and reader. The door controller is fitted on the secure side of the door, with the reader fitted on the other side. Switch2 offers a secure solution for customers wishing to control door access, who do not need the reports on users' movements provided by a PC based access control system.
