## ProSeries.

The ultimate end-to-end  
security and life safety  
platform.

# Introducing ProSeries.

## Everything you need to protect what matters most.

**At Resideo we know your home is as unique as you are. That's why we developed the ultimate professional security and life safety platform.**

Whether you're looking for a platform to protect against intruders, alert you to potential hazards, or just welcome you back after a long day, ProSeries offers a hassle-free package that grows over time alongside you. So you can relax and enjoy family life together, knowing you're protected by a trusted business, with products in over 150 million homes.

### Why ProSeries?

-  Best-in-class security
-  Smart home control
-  Whole home protection
-  Modular design

Peace of mind,  
at your fingertips.

ProSeries offers a self monitored option via an app or a professionally monitored security option.

# The ultimate security blanket, tailored to fit your home.

**Nothing matters more than protecting your home and the people inside it. Now there's a flexible solution that looks after the things you love.**

ProSeries is an ecosystem of security and life safety products that creates a home that looks after the people inside it. No more guesswork. No more DIY systems. Just you in control of your home.

Smart sensors detect fires, floods, carbon monoxide and smoke, even medical emergencies. The platform's sirens ensure everyone in the house knows if they need to get out quickly. It alerts you to movement and potential intruders that you can verify by video (so no more false alarms from mischievous pets!).

## Proven life safety.

Smart sensors detect smoke, and CO, triggering **One-Go-All-Go** alarms and alerting emergency services.

 SMART HOME CONTROL.

Invaluable when there's an emergency.  
Secure when there's not.

**Life is hectic enough. Now you can choose a security and life safety platform that brings all your smart home products together under one roof.**

ProSeries doesn't just protect you, it connects your home. From security settings to thermostat settings, you can check smart bulbs and appliances, and much more. All in one place.

When you're away, the Resideo Total Connect 2.0 app ensures you stay in touch with your home. Those scene-setting functions guarantee a warm welcome, as you can adjust lighting and thermostats automatically when you disarm the system.

**Why ProSeries?**

-  Voice control
-  Monitor from anywhere via an app
-  Smart home integration
-  Automatic unlock/disarm
-  Scene-setting function

Simple. Safe.  
Why compromise?

ProSeries grows with you, every step of the way, so you can focus on what really matters.

# ProSeries.

An adaptable security platform that can grow over time.

Smart Speaker

## Apps

- Total Connect 2.0**
- Remotely access the platform anywhere, anytime.
  - Control of security, video, smart devices and more.

- Resideo Pro**
- Installers can easily configure equipment to your home.
  - Installers can run remote diagnostics on your system and alert of any issues.

# What comes next?

## Relax and let your installer take it from here.

No two homes are the same, and we're all looking for something a little different from our security. Your preferred installer is here to help, working with you to tailor the ProSeries platform to your home, and your budget.

While full control of the platform stays in your hands, the installation, updates and maintenance should always be done using a professional installer.

This ensures your safety and security is set up to the highest of standards from the outset, there are no install gaps, and you get the right advice and peace of mind you deserve, from a trusted ProSeries professional.
