ALARM.COM®
for BUSINESS

Commercial Security

MULTIPLE LOCATIONS.
One view.

Manage intrusion detection, energy use, access and video systems across every business location in real time from a single, intuitive interface: The Enterprise Dashboard.
View real-time status of properties, filtered by arming state, open/close time and access state.

Organize locations into a top-down hierarchy of groups or regions, instead of managing locations separately.

Save time and increase consistency with global management of user codes, access permissions and system settings.

Ensure consistent security across all locations with automatic software updates, end-to-end encryption and two-factor authentication.

Schedule multi-site roll-up reports to get actionable insight across all properties automatically.

# A NEW WAY TO
Monitor Your Business

Transform the way you protect your business with Business Activity Analytics. This powerful feature uses your business cameras to monitor traffic flow and the movement of people across multiple locations to help you make informed decisions.

Determine total net occupancy at any given time with multidirectional counting

Use heat maps to track and visualize where people spend the most time within an area during a specified date or time range

Count how many people are in a defined area at any given point and get alerts when too many people are in one place

Measure average customer wait time and get alerts if the queue length or average wait time exceeds preset limits

Video Surveillance

24/7 on site recording, cloud event storage, health monitoring, and intelligent analytics ensure that your footage is always available when you need.

Automatically capture and store footage of alarms and arm/disarm events in secure, offsite cloud servers.

Perimeter detection analytics accurately detect people and vehicles entering your property, while filtering out unimportant motion like rain or shadows.

Receive real-time alerts for trespassers or unexpected guests in prohibited areas or after hours.

24/7 video health monitoring ensures that cameras are always online and recording with unobstructed views.

STREAMLINED
Access Control

Combine intuitive, cloud-based user management with seamless alarm and video integration in a scalable solution.

- Add or remove access users and cards in seconds with the Alarm.com app or web dashboard.

- Increase efficiency by bulk-adding hundreds of users at once or setting cards to automatically deactivate on a certain date.

- Lock, unlock and buzz doors open from anywhere with your mobile app.

- Reduce false alarms by setting your intrusion panel to automatically disarm when the first person accesses a door.

- Find video of access events instantly from your access history timeline.

Smarter Access Control with HID Aero is a powerful solution for managing access to your business properties. With multi-site management, swipe to disarm, expiring access and credentials bulk upload features, you can easily manage a wide range of access control and intrusion setups—all through Alarm.com's website and app.

INTELLIGENT
Energy Management & Temperature Monitoring
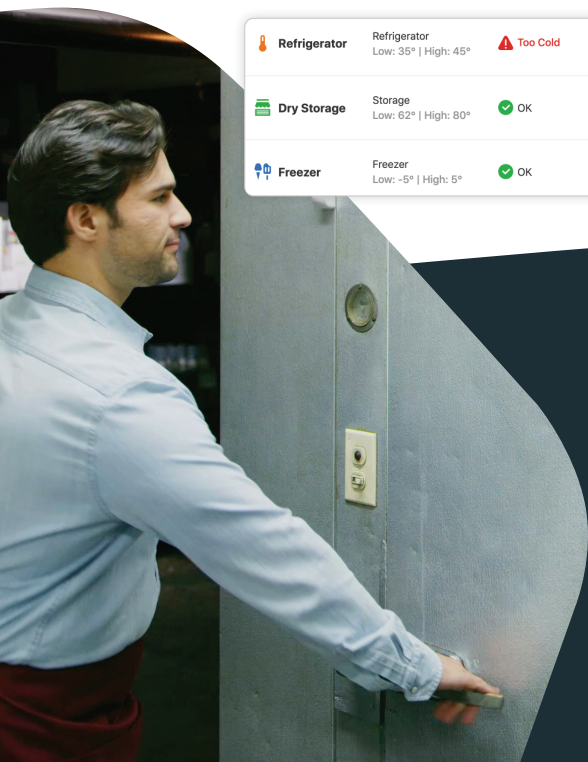

View, manage and control temperatures, set points, and local thermostat access across multiple locations.

Automate your thermostat schedules and save money with Smart Away Mode, which automatically adjusts temperatures when systems are armed and employees leave.

Track temperatures of critical assets like walk-in refrigerators and data closets. Receive alerts if temperatures exceed a set range.

Cellular communication and long battery life ensure that critical temperatures are monitored, even if the property loses power or internet.

Retrieve historical reports summarizing temperature conditions for compliance.

Refrigerator	Refrigerator Low: 35° | High: 45°	⚠ Too Cold	33°
Dry Storage	Storage Low: 62° | High: 80°	✓ OK	72°
Freezer	Freezer Low: -5° | High: 5°	✓ OK	-1°

ALARM.COM   now

Refrigerator issued a Temperature Alert (33°F) at 11:02 am.
