

SMARTER BUSINESS

Temperature Monitoring

Always-on temperature monitoring, real-time notifications and historical reports.

Extend property protection to temperature-controlled assets with Smarter Business Temperature Monitoring by Alarm.com. With 24/7 monitoring, real-time alerts and historical temperature reports, this service is ideal for single and multi-location business properties such as:

RESTAURANTS

GROCERY STORES

IT SERVER ROOMS

MEDICAL FACILITIES

WAREHOUSES

Smarter Business Temperature Monitoring notifies business owners of out-of-range temperatures so they can quickly prevent unsafe conditions, reduce spoilage and repair malfunctioning equipment, saving them time and money.

SMARTER BUSINESS TEMPERATURE MONITORING PROVIDES:

Temperature monitoring dashboard

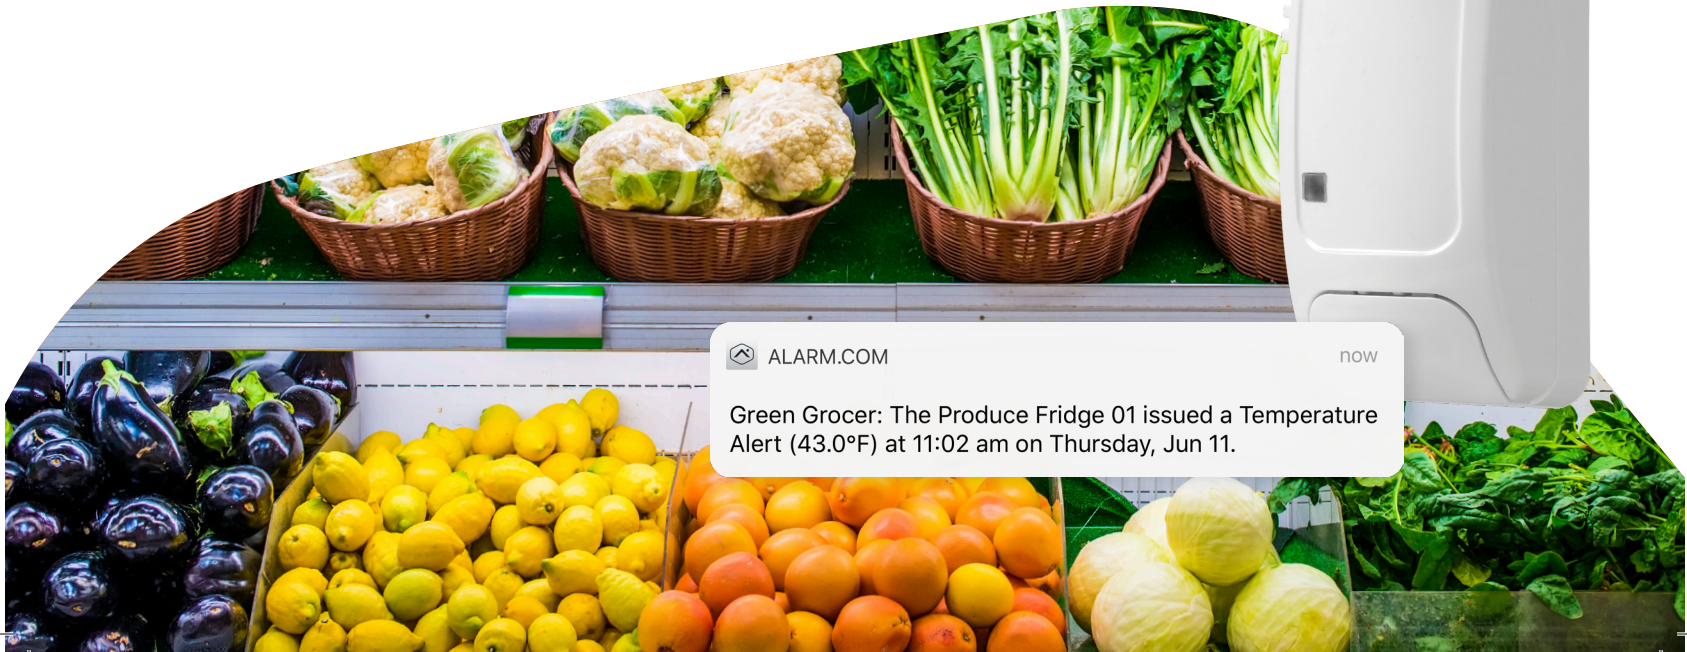

View real-time sensor temperatures at one or multiple locations

Out-of-range alerts

Receive email, SMS and push alerts triggered by customizable temperature limits

Historical reporting

Schedule daily, weekly or monthly historical temperature reports

 ALARM.COM now
Green Grocer: The Produce Fridge 01 issued a Temperature Alert (43.0°F) at 11:02 am on Thursday, Jun 11.

THIS SERVICE CAN BE USED TO MONITOR:

Cold Environments

Monitor refrigeration and freezing environments down to -4°F (-20°C)

Hot Environments

Monitor hot environments up to 122°F (-29°C)

External Environments

Optional 11' waterproof probe offers range of -22°F – 158°F (-30°C – 70°C)

Use probe to monitor outdoor environments

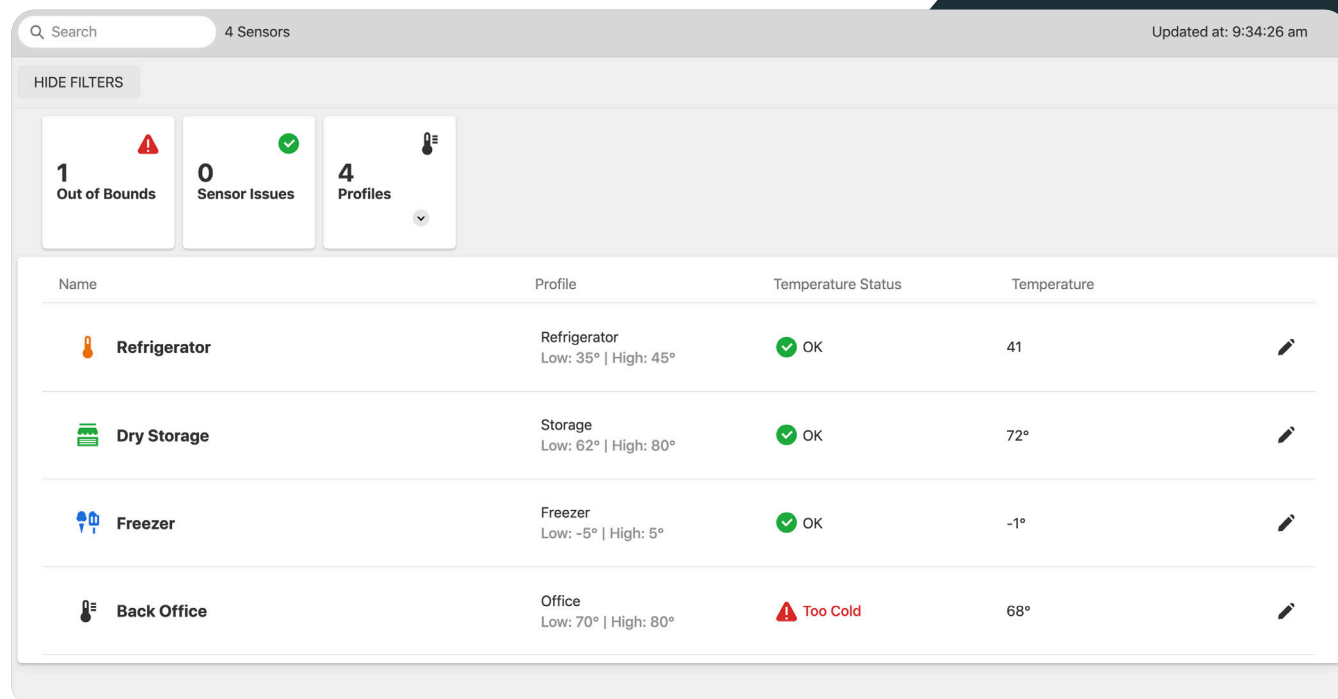

Sensor has a range of up to 1.2 mi away from panel

HOW IT WORKS:

1. Install the DSC PowerG Temperature Sensor in a cold, hot or outdoor environment.
2. Customize high and low temperature thresholds and notification settings.
3. Monitor current temperatures, receive real-time notifications and schedule reports.

WHAT IS REQUIRED?

Smarter Business Temperature Monitoring is compatible only with the DSC PowerG Temperature Sensor (PG9905). You must have a Commercial Plus plan with a Qolsys IQ2+, DSC PowerSeries Neo (ADC 6.2 module), or DSC PowerSeries Pro (ADC 6.2 module) panel.

The screenshot shows a web interface for monitoring 4 sensors. At the top, there is a search bar and a '4 Sensors' indicator. A 'HIDE FILTERS' button is visible. Below this, three summary cards show: 1 Out of Bounds (with a red warning icon), 0 Sensor Issues (with a green checkmark icon), and 4 Profiles (with a temperature sensor icon). The main table lists the sensors with their names, profiles, temperature status, and current temperature.

Name	Profile	Temperature Status	Temperature
 Refrigerator	Refrigerator Low: 35° High: 45°	 OK	41
 Dry Storage	Storage Low: 62° High: 80°	 OK	72°
 Freezer	Freezer Low: -5° High: 5°	 OK	-1°
 Back Office	Office Low: 70° High: 80°	 Too Cold	68°
