

RAISE THE FIRE SAFETY STANDARD WITH THE ENHANCED ENDURANCE SERIES

Smarter safety doesn't have to be complicated. Fire-Lite's innovative, addressable control panels offer more capability and convenience than ever before with the powerful ES-XP Series. The ES-50XP and ES-200XP offer a complete turn-key fire safety solution by combining the dependable ES Series of addressable FACPs with an integrated dual-SIM (AT&T/Verizon) 5G LTE-M communicator.

This combined solution reduces installation and labor costs, enables faster and more reliable central station reporting and provides a complete line of site monitoring plus access to automated test and inspection reporting through Honeywell's Connected Life Safety Services (CLSS) cloud solutions. CLSS is an innovative, all-in-one cloud software platform that enables systems integrators and facilities managers to deliver an enhanced fire safety service, while maximizing the performance efficiencies offered by Honeywell's trusted detection and alarm systems.

The enhanced ES-XP Series of addressable FACPs can help you tackle more complex projects while providing superior value and flexibility, making every day on the job as easy and predictable as the next.

ES-XP BENEFITS

- Offers up to 40 seconds faster alarm delivery to the central station vs. legacy POTS communication methods
- Increases reliability and peace of mind with built-in dual path cellular and IP communication options
- Redundant dual-SIM configuration supports both AT&T and Verizon 5G LTE-M networks

CLSS SOFTWARE FEATURES

- CLSS CheckPoint digitizes the test and inspection process so you can easily generate standard or customizable reports through the web or mobile app
- CLSS Site Manager provides a "bird's eye" view of all your accounts and real-time information on event generation so you can diagnose before dispatch. Reduce unnecessary trips and improve your first-time fix rate.
- CLSS Facility Manager provides your end users with event alerts via mobile app and access to asset information across multiple sites
