Flexible Storage Options Available with Capture Cloud CMVRs

Store Video On-Premise, in the Cloud, or a Combination of Both While Using Capture Cloud VMS

Local Storage – M10 Service Plan

Our local storage service option offers no cloud storage but gives customers the chance to store video locally on CMVRs. The M10 Service Plan allows cameras to store video on the CMVR’s local hard drive. This will not store any video in the cloud, so there is no cloud retention or resolution cost associated with this subscription. Customers can still manage systems remotely, view live or recorded video, directly through the VMS. Subscriptions are priced per camera and can be billed monthly or yearly. Storage capacity will vary based on your CMVR, however the M10 service can preview up to 1 day in the cloud per camera, at no additional charge. Reach out to your local ADI sales person for hardware options that can meet your local storage needs.

R2-M101 (No Cloud Storage)	Price Per Month	\$4.28
R2-M1012 (No Cloud Storage)	Price Per Year	\$46.21

Local Storage with Cloud Preview - PR1 Service Plan

Similar to M10, this service is only available on our CMVRs. The PR1 Service Plan will store previews of video in the cloud for a select retention time, the price will vary based on the length of preview retention. Full video remains stored on the local recorder, previews are all stored in the cloud, this will allow a more affordable, longer retention to meet your requirements. Also similar to the M10 plan, this local storage and preview can be viewed and fully managed remotely via Capture Cloud VMS.

LPR: License Plate Recognition Subscription Details

Capture Cloud LPR (License Plate Recognition) is an add-on service available to an existing Capture Cloud Serviced Account. It offers a cloud-managed solution for accurate detection and recognition of license plates. This is a cost-effective method of turning any existing ONVIF security camera into a highly accurate license plate reader.

There are a few requirements:

- An existing Cloud Subscription must be tied to this camera. LPR cannot be tied into M10 or PR1.
- VSP and LPR is supported on select Bridges and CMVRs. Reach out to your local ADI sales person for more information.

Subscriptions are priced per camera. To Enable License Plate Recognition to any ONVIF Profile Camera, VSP and LPR subscriptions must both be enabled as a requirement, see pricing below:
