

LG ConnectedCare™ DMS

a cloud service that provides specialized solutions for educational environments, offering real-time monitoring and remote device control.

MONITORING

- Real-time monitoring via an online dashboard
- Issue detection with email alerts

DEVICE CONTROL

- Centralized and remote control over display equipment and LG CreateBoard™

BROADCAST / ALERT MESSAGES

- Messages and a range of other content can be sent from the main systems hub to individual classroom devices

With **LG ConnectedCare™** control a wide-ranging ecosystem of LG products from just one dashboard.

Projectors

Attempting to manage multiple devices individually can be a potentially time-consuming problem. The LG ConnectedCare™ DMS allows centralized and simple control over display equipment and LG CreateBoard™, increasing efficiency and convenience through remote operation.

Remote Control

Device functions such as power on/off, scheduling, brightness, and screen lock can be applied remotely, while content such as images, videos, audio messages, and live streaming can also be shared.

Multi-Control

Select multiple devices to be controlled updated. General settings, power settings, application management, and multimedia can all be effectively managed and controlled simultaneously.

Scheduling

Confirm existing schedules or quickly and easily create new ones. Various user-friendly features can be activated and scheduled, including brightness and locking, etc.

Cloning Settings Data

Integration of new equipment is made smoother by migrating existing settings to new devices.
