Easy to build. Easy to sell. Easy to install.

Learn how to build a small site managed by AXIS Companion

The system is easy to install and ready to expand alongside your customers to monitor offices, shops and homes with superior quality. Discover just how easy it is to build out a solution with AXIS Companion.

3 components for a complete, simple surveillance solution

AXIS Companion video management software

- > Free, optimized, plug-and-play recording software
- > Intuitive user interface with alert notifications
- > Mobile app for remote viewing
- > It's a perfect solution for systems with up to 16 network devices
- > Download for free at www.axis.com/products/axis-companion

AXIS S3008 Network Video Recorder

- > Supports AXIS Companion video management software
- > Available in 2 TB, 4 TB and 8 TB models connecting up to 8 devices each
- > LLDP protocol to reserve max power of each connected device
- > Integrated PoE switch and surveillance-grade hard drive
- > USB port for exporting video

Axis network cameras

- > Choose from the affordable M-line to the powerful Q-line
- > Any camera with firmware of 8.40 or higher is compatible

Optional value-adds:

Axis network intercoms

- > Seamless entry management within AXIS Companion
- > Two-way audio communication
- > Recommendation: AXIS A8105-E Network Video Door Station

Axis network audio

- > Make live announcements directly from a mobile device or desktop
- > Easily address people and deter unwanted activity
- > Recommendation: AXIS C1410 Network Mini Speaker

Axis analytics

- > Be more efficient and proactive with alert notifications
- > AXIS Guard Suite includes analytics for smart motion, intrusion and loitering detection
- > AXIS Object Analytics classifies humans and vehicles (on select cameras)
