

**LUMA**VIEW™

## An Enhanced Client Experience with Luma View App

The Luma View app redefines client access to surveillance systems, offering intuitive on-site and remote viewing. With AI-filtered events, activity highlights, and Search Events, clients can quickly locate key moments without scrubbing through hours of footage. Features include push notifications, easy access to recordings, clip sharing, and advanced AI tools for fast, seamless event discovery.

**AI-Filtered Events:** Luma's advanced AI technology helps your clients view important events fast and easy. No more scrubbing through hours of footage to get to what matters most!

**Recording Playback:** With Synchronized Event Playback your clients can watch up to 16 channels simultaneously to view key events from multiple perspectives.

**Search Events:** Filter and search AI events through a list of specific activities that also include a thumbnail to find what they're looking for even sooner.

**Save and Share Clips:** Clients can quickly save a clip for future viewing or quickly share it with others.
