Capture — powered by Eagle Eye Networks

How to Install:

Installing Capture Direct to Cloud is simple. You need two things: a Capture Advance camera and a Capture Cloud VMS account.

To create a Capture Cloud VMS account, call Capture Cloud Support at 512.301.9710. Once you have an account, follow the steps below:

1. Connect a Capture Advance camera to a network with internet access (Leave the camera at default — no need to login or do anything to prepare the camera)
2. Login to your Capture Cloud VMS account
3. Click the three dots in the upper right corner of the Dashboard
4. Select "Add Camera Direct"
5. Enter the Camera Name and MAC Address
6. Click the green "Add Camera" button

A camera is either added to a bridge/cmvr or as "Camera Direct" to the cloud.
