

## FS SERIES

### Fully Assembled - Accessories Included

Pre-built for fast installation, the FS Series rack has everything you need in the box, including doors, side panels, casters, cooling fans, and assorted shelves and vents.

#### Fully Assembled

Because it's pre-built to deliver an installer-friendly setup, this rack system offers you a quick and simple way to store professional equipment.

#### Up to 1000 LB Capacity

Lighter and narrower than competitors by design, the FS Series is easy to navigate through doors and into tight spaces, and boasts a weight capacity of up to 1000 pounds.

#### Active DC Cooling

Using a combination of vents on the bottom and DC fans on the top, this rack keeps equipment at the proper temperature via active cooling. Equipped with a 6V power supply, its DC fans are quieter than ever, and are easy to speed-adjust with optional controllers.

#### Additional Fan Control

Pair the FS series racks with one of our Cool Components™ Advanced System Controllers for programmable thermostats and automatic temperature regulation.
