Dear Customers:

Limited Warranty

TP-Link Systems Inc. ("TP-Link USA") provides a limited warranty on all eligible TP-Link products purchased in the United States. This limited warranty covers failures due to defects in material or workmanship for devices, antennas, and accessories*, commonly referred to as "manufacturer defects." Packaging, software products, and technical data are not covered under the limited warranty. The maximum liability of TP-Link USA is the product purchase price.

Coverage under this limited warranty begins from the date the original purchase is delivered and is only applicable to the original purchaser of the product. Second-hand goods, such as products sold as "used," "as is," or "open box", are generally not covered under this limited warranty. A valid proof of purchase and a complete product serial number are required to receive any services guaranteed as part of this limited warranty. This limited warranty does not apply if the product has been modified in any way or has a defaced or removed serial number.

This limited warranty does not apply to refurbished products or products resold by unauthorized resellers. Products sold by unauthorized resellers are considered second-hand goods and do not qualify for warranty services. For TP-Link Refurbished Product Warranty Policy, please visit <http://www.tp-link.com/us/support/refurbished/>

TP-Link USA's limited warranty does not provide refunds, returns, or exchanges under most conditions. Product(s) replaced under this limited warranty are typically replaced with factory refurbished product(s). If the defective product(s) are discontinued, end-

of-life, or out of stock, TP-Link USA, at its discretion, will issue a replacement product with comparable features. This may result in a replacement product that is a different model or value. Product warranty periods are not renewed or extended for any replacement products provided under this warranty policy. The original purchase date and warranty period will apply to any replacement products until the end of the original warranty period.

Conditions that Disqualify Products from the Limited Warranty

Conditions that disqualify products from the limited warranty include, but are not limited to:

- Any defects or damages caused by normal wear and tear, accidents, improper installation or maintenance, misuse (including failure to follow product documentation), neglect, disassembly, alterations to the hardware or supporting setting files, servicing other than by TP-Link USA authorized technicians, and external causes such as, but not limited to, natural disaster, water damage, extreme thermal or environmental conditions
- Any defects caused by software, virus, or improper use of self-made, non-public or third-party/open-source software
- Any unauthorized obliteration or tearing up of the product barcode
- Any defects caused by transportation or loading during returning voyage
- Any other defects that are not caused by workmanship or product quality

For external power supplies, conditions that disqualify products from the limited warranty include, but are not limited to:

- Returned power supply units that have obvious hard object damage, fissure, broken legs and/or severe deformation;
- Returned power cord that is broken, has an exposed core or similar damages.

Limited Lifetime Warranty*:

A. Limited lifetime warranties only apply to the original purchaser and do not transfer. Second-hand business-class products or products sold by unauthorized resellers do not carry a limited manufacturer warranty. RMA requests for such products will be denied.

B. Warranties on products that are discontinued/end-of-life will be limited to a period of (5) years from the end-of-life date, as set by TP-Link USA. Discontinued status is based on the model number and not the hardware revision.

C. Only the product and its internal parts are covered under the limited lifetime warranty. External parts such as external power supplies, modules, and other accessories may be covered under separate warranties. Please refer to TP-Link business-class accessories for more information.
